

Dans le cadre d'une séquence sur l'environnement  
Thématique 2: axes 2 et 3.

Tâche finale E.O.C sur le développement durable dans les mégaloilles à l'aide d'une maquette créée par les élèves puis présentée oralement.

# Megacity of the future

**Create a 3D model** of a sustainable megacity to present it to the mayor.

Remember to answer the following question:

How are megacities tackling the challenging subject of sustainability?

## CHARACTERISTICS YOU MUST INCLUDE IN YOUR MODEL:

Imagine renewable energies (production and distribution) + waste management

Think about sustainable public transport + city's organisation (areas)

Think about food production and distribution

Think about housing, amenities and infrastructures to fight against pollution and natural disasters

Use the documents studied in the unit as well as the following website to inspire you :  
<https://megacitiesproject.org/>
